Community of Practice
website was built through
funding provided by

Owned by the Victorian Government, Melbourne Water manages Melbourne's drinking water catchments, removes and treats most of Melbourne's sewage, and manages rivers, creeks and major drainage systems across the Port Phillip and Westernport region. Melbourne Water invests around \$31 million a year in protecting and improving the health of our rivers and creeks and supports over 10,000 volunteers involved in helping to protect Melbourne's rivers and creeks.
